

BRANDING BREWERIES

The versatility of a CO2 laser system allows craft breweries, microbreweries, and distilleries to customize a variety of in-house products as well as promotional giveaways.

New brew on tap? That calls for a custom tap handle. New batch of bourbon? Better etch some custom shot glasses to commemorate the occasion. Hosting a private event? Engrave some pint glasses or bottle openers for a fun giveaway!

Versatility

Epilog's systems allow you to engrave/etch a variety of materials – wood, cork, glass, fabric, acrylic, and so much more!

Capabilities

Add a rotary attachment option to engrave pint glasses, wine glasses, shot glasses and more!

Wide Variety

Whether you're looking for a small table-top engraver or a large-format system, we have laser systems that can customize and brand your most popular products. From one custom growler to hundreds of coasters, we have a machine to meet your needs!

Cylindrical Objects

Epilog's Rotary Attachment allow you to easily set up different size glasses, mugs and even growlers for custom engraving! The rotary turns as the laser engraves your logo/design, achieving true 360° etching.

Efficiency

Our exclusive Job Manager software gives you instant access to your most common and popular jobs. The Job Manager makes it easy to create your very own custom files structure, which helps streamline your engraving processes and significantly reduce downtime. Need to crank out a series of branded coasters? Simply pull it up in the Job Manager, load up the laser and send your job!

Machines to Fit Your Needs

Whether you are looking for a compact system to engrave custom cutting boards, or a large-format machine to etch a table full of glasses, we design a range of laser systems to meet varying needs.
